Lorraine Oosthuizen

Financial Manager

Industry: Service Provider

No. of users: 5 user core

Modules: Accounting

“Pastel Evolution has ensured that we simply cannot go wrong with day-to-day sales and distribution processes, such as coordinating and placing purchase orders with suppliers and processing retail customer sales orders. As a result, our delivery process has been significantly streamlined. Sales staff are not typically PC orientated, which is where Evolution has made a real difference. The system is easy to use and does not require much deciphering to operate. Sales people can now create POs with ease, and much quicker than before. Evolution also offers powerful reporting features. Reports can be easily compiled and are also very easy to interpret. The result has been fast access to accurate information on sales, stock inventory, financials as well as outstanding sales orders. Evolution has also provided us with excellent tax reporting capabilities and the facility to easily submit payroll information to SARS. **If you have worked on Pastel Evolution, you wouldn’t want to work on anything else.**” – Lorraine Oosthuizen, Financial Manager, Cabinet Classics
